

U.S. Naval Research Laboratory

Center for Computational Materials Science

Computational Research Scientist

The **Center for Computational Materials Science** at the **Naval Research Laboratory** invites applications for a permanent **Research Scientist** position. The Center conducts basic theoretical and computational research spanning a broad spectrum of materials and phenomena. For more information see our website, <http://cst-www.nrl.navy.mil>.

We offer a vibrant and challenging research environment, as well as considerable freedom to develop and pursue new research directions. A PhD, or equivalent, and postdoctoral experience are highly desirable. Salary will be determined based on background, experience, and market consideration.

Candidates should send their application electronically to **steve.erwin@nrl.navy.mil**. The application consists of a curriculum vitae, a list of publications, and a one-page description of research interests. Candidates should also arrange for 3 letters of reference to be forwarded electronically. **The deadline for applications is 15 November 2010.**

US citizenship or Permanent Residency is required. NRL is an Equal Opportunity Employer.
